JOSÉ DAVID AYALA FRANCO

FULL-STACK SOFTWARE ENGINEER - CLOUD & INFRASTRUCTURE | FULL STACK & BACKEND

Parácuaro, Michoacán, México • 453-152-7363 • josedavidayalafranco3@gmail.com

Github: DavidFranco3 • Linkedin: David Franco • NPM: davidfranco3

PROFESSIONAL PROFILE

Full-Stack Software Engineer with 4 years of experience building and deploying scalable web applications and cloud-native services (TypeScript, React, Node.js, SQL). Specialist in RESTful API architecture, Docker containerization, Linux environment administration, and automated delivery pipelines with CI/CD on AWS. Focused on high availability, system observability, secure environment configuration, and agile production troubleshooting. Bilingual (English C1-C2) with a strong commitment to end-to-end software delivery ownership.

TECHNICAL COMPETENCIES

- **Cloud & DevOps (Focus):** Docker | CI/CD Pipelines | AWS (EC2/S3) | Linux Administration | Git | Postman
- **Backend & APIs:** Node.js | Express.js | RESTful APIs | JWT / OAuth | Microservices | Laravel | PHP
- **Frontend & UI/UX:** React | JavaScript | TypeScript | Tailwind CSS | HTML5/CSS3
- **Databases:** MySQL | SQLite | MongoDB
- **Mobile:** Flutter | Dart | Kotlin | Java
- **Methodologies & Testing:** Scrum / Agile | Kanban | Unit Testing (Jest) | Clean Code | Prompt Engineering
- **Languages:** Spanish: Native | English: C1-C2

PROFESSIONAL EXPERIENCE

ISOTECH *2022 - Present*

Full-Stack & Cloud Infrastructure Engineer

Technical owner for the full delivery lifecycle of enterprise web platforms and cloud-based services (TypeScript, Node.js, React, Laravel, and Docker), spanning software architecture, Linux server provisioning, continuous deployment, and production support.

- Architected and migrated a monolithic system into a distributed microservices architecture using Node.js, Express, and TypeScript, slashing response latency by 85% (from 800ms to 120ms).
- Designed and deployed modern web applications using React and TypeScript, implementing modular component architecture, hooks, and efficient state management.
- Automated continuous delivery workflows by engineering CI/CD pipelines and Docker containerization, accelerating deployment speed and cutting production regression rates by 40%.
- Configured and maintained Linux application servers and AWS cloud resources (EC2, S3), enforcing security best practices, environment variables, and secure secrets management (JWT / OAuth).
- Optimized index tuning, table partitioning, and complex SQL queries in MySQL, cutting analytical report processing times from 45s to 3s (a 93% performance gain).
- Implemented automated unit testing suites (Jest) and REST endpoint verification with Postman, ensuring software resilience and zero-defect releases prior to production.
- Monitored and resolved production incidents through root-cause analysis across code, infrastructure, databases, and network layers (HTTP/HTTPS, DNS), sustaining 24/7 availability.
- Standardized Clean Code guidelines, PR reviews, and technical deployment documentation, mentoring junior engineers to achieve autonomous production onboarding in under 2 months.

EDUCATION

INSTITUTO TECNOLÓGICO SUPERIOR DE APATZINGÁN *2018 - 2023*

Computer Engineering

Specialization in data structures, algorithms, and software engineering fundamentals.

CERTIFICATIONS

Introduction to AI Development *October 2026 (4 hrs)*

mouredev & BIG school

English Level C1-C2 *August 2026 (177 hrs)*

Edutin Academy • ID: 18696518 • app.edutin.com/verify/18696518

Mobile Applications Course *August 2026 (7 hrs)*

BSG Institute • ID: 10971648A31172D0P1
