JOSÉ DAVID AYALA FRANCO

MOBILE & ANDROID DEVELOPER | FULL STACK & BACKEND

Parácuaro, Michoacán, México • 453-152-7363 • josedavidayalafranco3@gmail.com

Github: DavidFranco3 • Linkedin: David Franco • NPM: davidfranco3

PROFESSIONAL PROFILE

Mobile & Software Engineer with 4 years of experience in software development, specializing in the design, architecture, and deployment of Android applications (Kotlin, Java, Flutter). Proven track record implementing modular architectures (Clean Architecture / MVVM), local persistence with SQLite, and secure RESTful API consumption in Agile (Scrum) teams. Skilled in optimizing performance, memory, and offline-first data synchronization while ensuring secure token handling in production. Certified in Mobile Application Development and bilingual in English (C1-C2).

TECHNICAL COMPETENCIES

- **Mobile & Android (Focus):** Android Studio | Kotlin | Java | Flutter | Dart | Clean Architecture / MVVM
- **Backend & APIs:** Node.js | Express.js | RESTful APIs | JWT / OAuth | Microservices | Laravel
- **Databases:** SQLite | MySQL | MongoDB
- **Frontend & UI/UX:** React | JavaScript | TypeScript | Tailwind CSS | HTML5/CSS3
- **DevOps & Tools:** Git | Postman | CI/CD | Docker | AWS (EC2/S3) | Linux
- **Methodologies & Testing:** Scrum / Agile | Kanban | Testing (Jest/Postman) | Clean Code | Prompt Engineering
- **Languages:** Spanish: Native | English: C1-C2

PROFESSIONAL EXPERIENCE

ISOTECH *2022 - Present*

Mobile & Android Developer | Software Engineer

Technical owner for the development lifecycle of mobile applications and commercial enterprise software, ensuring high performance, efficient API communication, and transactional security on Android platforms.

- Architected and published production mobile applications for Android and iOS using Kotlin, Java, and Flutter/Dart, implementing local SQLite persistence and offline-first background synchronization.
- Engineered the network layer and secure RESTful API consumption with token authentication (JWT / OAuth), ensuring data integrity in transit and cutting client-server failures by 40%.
- Optimized mobile application performance (memory profiling, async request latency, and UI rendering), slashing load times across mission-critical screens by 85%.
- Integrated a real-time geolocation, tracking, and route calculation mobile engine with Google Maps and Mapbox APIs, automating dispatching and reducing logistics costs by 25%.
- Structured local data models and query optimization plans on SQLite, reducing analytical data processing and in-app report generation from 45s to 3s (a 93% performance gain).
- Implemented automated testing suites and endpoint validation using Postman and testing frameworks, driving a 40% reduction in regression rates and production release defects.
- Standardized Clean Architecture guidelines, rigorous Code Reviews, and API documentation, mentoring junior engineers to achieve autonomous production onboarding in under 2 months.
- Integrated AI-assisted engineering workflows to accelerate legacy refactoring, test case generation, and technical documentation, boosting weekly team productivity by ~8 hours.

EDUCATION

INSTITUTO TECNOLÓGICO SUPERIOR DE APATZINGÁN *2018 - 2023*

Computer Engineering

Specialization in data structures, algorithms, and software engineering fundamentals.

CERTIFICATIONS

Introduction to AI Development *October 2026 (4 hrs)*

mouredev & BIG school

English Level C1-C2 *August 2026 (177 hrs)*

Edutin Academy • ID: 18696518 • app.edutin.com/verify/18696518

Mobile Applications Course *August 2026 (7 hrs)*

BSG Institute • ID: 10971648A31172D0P1
