To: Talent Acquisition Team | Bradescard México

Application for Android Specialist / Mobile Software Engineer

Dear Talent Acquisition Team at Bradescard México, I am writing to express my strong interest in joining your team as an Android Specialist / Mobile Software Engineer. With 4 years of software engineering experience specializing in Android development (Kotlin, Java, Flutter), modular design (Clean Architecture / MVVM), and secure API integration, I am confident in my ability to deliver resilient, high-performance mobile solutions for your financial platforms.

Throughout my career at Isotech, I have engineered and published cross-platform mobile applications and enterprise systems. Key achievements include implementing local SQLite persistence with offline-first synchronization, securing API communications via token authentication (JWT / OAuth), optimizing memory usage to reduce latency by 85%, and slashing local data query times from 45s to 3s.

I hold a professional certification in Mobile Application Development, along with a deep dedication to clean code craftsmanship, comprehensive code reviews, automated testing with Postman, and AI-assisted workflows that optimize delivery speed. Furthermore, I possess certified English proficiency at the C1-C2 level.

My degree in Computer Engineering combined with my full-stack foundation enables me to understand both the mobile client and the backend services it integrates with. Thank you for your time and consideration; I welcome the opportunity to discuss my qualifications in an interview.

Sincerely,

José David Ayala Franco
Mobile & Android Developer
