JOSÉ DAVID AYALA FRANCO

SOFTWARE DEVELOPER | FULL STACK & BACKEND

Parácuaro, Michoacán, México • 453-152-7363 • josedavidayalafranco3@gmail.com

Github: DavidFranco3 • Linkedin: David Franco • NPM: davidfranco3

PROFESSIONAL PROFILE

Computer Engineer with 4 years of experience in Full Stack development, specializing in backend architecture, microservices, and high-concurrency web platforms. Proven track record leading the design and delivery of custom enterprise software for corporate clients across diverse industrial and commercial sectors. Creator and maintainer of open-source libraries on NPM for the Node.js and React ecosystems. Dedicated to clean code, database performance optimization, and the adoption of modern AI-assisted engineering workflows.

TECHNICAL COMPETENCIES

- **Backend (Focus):** Node.js | Express.js | Laravel | PHP | RESTful APIs | JWT / OAuth | Microservices
- **Frontend & UI/UX:** React 19 | JavaScript (ES6+) | TypeScript | Tailwind CSS | SASS | HTML5/CSS3
- **Mobile:** Flutter | Dart | Kotlin | Java
- **Databases:** MongoDB | MySQL | PostgreSQL
- **DevOps & Tools:** Docker | CI/CD | AWS (EC2/S3) | Git | Vite | Postman | Linux
- **Methodologies & AI:** Scrum / Agile | Kanban | TDD / Testing (Jest) | MVC | Prompt Engineering
- **Languages:** Spanish: Native | English: C1-C2

PROFESSIONAL EXPERIENCE

ISOTECH *2022 - Present*

Full Stack Developer

Technical lead for the architecture, development, and delivery of custom web platforms and software products (MERN, Laravel, Flutter, and microservices) commercialized for corporate clients across diverse sectors.

- Directed the end-to-end lifecycle of multiple enterprise web platforms (MERN & Laravel) delivered to corporate clients, ensuring high availability and transactional data integrity in production.
- Led the architectural transition from a legacy monolith to distributed services in Node.js, decoupling high-concurrency modules and reducing latency by 85% (800ms to 120ms).
- Engineered a real-time geolocation and route optimization engine (Google Maps & Mapbox), automating dispatching and reducing operational logistics times by 25%.
- Architected and published cross-platform production mobile apps with Flutter/Dart (iOS & Android), implementing background synchronization and offline-first architecture.
- Structured index tuning and query optimization strategies in MySQL, cutting analytical report processing time from 45s to 3s (a 93% improvement).
- Standardized Clean Code guidelines, PR reviews, and mentored junior engineers, driving their technical autonomy and production onboarding in under 2 months.
- Implemented automated test suites (Jest, Postman) integrated into CI/CD pipelines, reducing regression rates and production defects by 40%.
- Integrated AI-assisted engineering workflows to accelerate complex refactorings, unit test generation, and technical documentation, saving ~8 hours of team capacity weekly.

EDUCATION

INSTITUTO TECNOLÓGICO SUPERIOR DE APATZINGÁN *2018 - 2023*

Computer Engineering

Specialization in data structures, algorithms, and software engineering fundamentals.

CERTIFICATIONS

Introduction to AI Development *October 2026 (4 hrs)*

mouredev & BIG school

English Level C1-C2 *August 2026 (177 hrs)*

Edutin Academy • ID: 18696518 • app.edutin.com/verify/18696518

Mobile Applications Course *August 2026 (7 hrs)*

BSG Institute • ID: 10971648A31172D0P1
