Application for Senior Developer (TypeScript, AWS & Frontend)

Dear Talent Acquisition Team at Azkait, I am writing to express my strong interest in joining your team as a Senior Developer (TypeScript, AWS & Frontend). With 4 years of software engineering experience specializing in component-driven frontend architecture with TypeScript, advanced UI styling (HTML5, SCSS/CSS3), and cloud service integration with AWS and Docker, I am confident in my ability to quickly add value to your high-performance client projects.

Throughout my career at Isotech, I have designed and delivered mission-critical web platforms. Key achievements include building scalable, strictly-typed frontend architectures in TypeScript, consuming cloud services in AWS (S3, REST APIs), containerizing applications with Docker, and setting up automated CI/CD pipelines that reduced release defects by 40%.

I bring solid expertise in responsive layout design, web accessibility standards, Git-based code reviews, and Agile methodologies. Furthermore, I hold certified bilingual proficiency in English (C1-C2), enabling seamless collaboration in distributed global engineering environments.

My degree in Computer Engineering and deep command of TypeScript give me an exceptionally fast learning curve across frontend frameworks and cloud ecosystems. Thank you for your time and consideration; I welcome the opportunity to discuss my qualifications during an interview.

Sincerely,

José David Ayala Franco
Senior TypeScript / AWS & Frontend Developer
