JOSÉ DAVID AYALA FRANCO

SOFTWARE ENGINEER | FULL STACK & BACKEND

Parácuaro, Michoacán, México • 453-152-7363 • josedavidayalafranco3@gmail.com

Github: DavidFranco3 • Linkedin: David Franco • NPM: davidfranco3

PROFESSIONAL PROFILE

Software Engineer with 4 years of experience in Full Stack development, specializing in microservices architecture, RESTful APIs, and enterprise commercial platforms (TypeScript, Node.js, React, SQL). Proven track record delivering production-grade systems in Agile teams with Docker and CI/CD pipelines. Active adopter of AI-assisted development workflows to accelerate refactoring, test generation, and code quality. Bilingual (English C1-C2) with a strong focus on technical ownership and business value.

TECHNICAL COMPETENCIES

- **Backend (Focus):** Node.js | Express.js | Laravel | PHP | RESTful APIs | JWT / OAuth | Microservices
- **Frontend & UI/UX:** React | JavaScript | TypeScript | Tailwind CSS | SASS | HTML5/CSS3
- **Mobile:** Flutter | Dart | Kotlin | Java
- **Databases:** MongoDB | MySQL | SQLite
- **DevOps & Tools:** Docker | CI/CD | AWS (EC2/S3) | Git | Vite | Postman | Linux
- **Methodologies & AI:** Scrum / Agile | Kanban | TDD / Testing (Jest) | MVC | Prompt Engineering
- **Languages:** Spanish: Native | English: C1-C2

PROFESSIONAL EXPERIENCE

ISOTECH *2022 - Present*

Software Engineer | Full Stack & Backend

Technical lead responsible for the design, architecture, and delivery of custom web platforms and commercial enterprise software (MERN, Laravel, Flutter, and microservices) for client companies across diverse industrial and commercial sectors.

- Directed the end-to-end development lifecycle of multiple enterprise web platforms (MERN, Laravel) in Agile (Scrum) teams, ensuring high availability, production support, and data consistency.
- Architected and migrated a legacy monolithic API to distributed microservices with Node.js, Express, and TypeScript, slashing response latency by 85% (from 800ms to 120ms).
- Optimized index tuning and complex queries in MySQL for transactional and analytics modules, cutting report generation times from 45s to 3s (a 93% performance improvement).
- Integrated AI-assisted engineering workflows (unit test generation, refactoring, API specs), boosting team delivery capacity by ~8 hours weekly while reducing technical debt.
- Implemented automated test suites (Jest, Postman) coupled with CI/CD pipelines and Docker, driving a 40% reduction in regression rates and production defects.
- Designed and engineered a real-time geolocation and route optimization engine (Google Maps & Mapbox APIs), automating dispatching and cutting logistics costs by 25%.
- Developed and deployed production cross-platform mobile apps in Flutter/Dart (iOS/Android), implementing background sync and offline-first architecture for field operations.
- Standardized Clean Code guidelines, PR reviews, and technical documentation, mentoring 4 junior engineers to achieve autonomous production onboarding in under 2 months.

EDUCATION

INSTITUTO TECNOLÓGICO SUPERIOR DE APATZINGÁN *2018 - 2023*

Computer Engineering

Specialization in data structures, algorithms, and software engineering fundamentals.

CERTIFICATIONS

Introduction to AI Development *October 2026 (4 hrs)*

mouredev & BIG school

English Level C1-C2 *August 2026 (177 hrs)*

Edutin Academy • ID: 18696518 • app.edutin.com/verify/18696518

Mobile Applications Course *August 2026 (7 hrs)*

BSG Institute • ID: 10971648A31172D0P1
